

FLEXIBLE HEATING PANELS

DESCRIPTION

Flexible heating mat protected with two polyester mats covered with PVC : the red side is the heating one, the blue side is the heat-insulating side.

Flexible heating panels can be easily tightened with eyelets or fastening tape.

APPLICATIONS

- To warm volumes, such as drums, tanks.
- To warm large surfaces, such as huge iron sheets, concrete flags.

ELECTRICAL CHARACTERISTICS

- Voltage : 12 à 400 V
- Maximum output : standard 400 W/m² to measure until 700 W/m²
- Supply cable : H07 RNF

HEAT CHARACTERISTICS

- 80 °C integrated heat protector (when output > 150 W/m²).
- Maximum maintenance temperature (power ON) : +60 °C.
- Maximum exposure temperature (power OFF) : +80 °C.
